TOKEN REQUEST

Anonymous Authenticated Ballot System. This is not a ballot.

election	demo-261023
configuration	89021f047fb0dafa69175e0274889ac3611885e2491af799b670fc6b327cdeee
fingerprint of c	580e-efb7-5a50-b8b2

By signing this document I request one ballot token for the election named above. The document does not record, and cannot record, how I will vote: the value below conceals the key that will carry my ballot, and the office that signs the token never sees that key. The fingerprint above is of that value, and should match the one shown by the application that produced this file.

c - the blinded ad-hoc public key, base64url, 64 characters to the line:

```

The same three values are carried in an embedded file and in a marker comment. The office rebuilds this document from them and refuses the file if what it rebuilds is not what it was given.
